

ESI Time & Attendance Manager

for ESI Communications Servers and IP Server 900 Systems

ESI Time and Attendance Manager is one of the premier employee management programs on the market today. Its intuitive design is perfectly suited for small to medium-sized businesses, providing a seamless integration to your ESI telephone system.

Tracking employee time, monitoring attendance and controlling unnecessary overtime are just a few benefits that this program has to offer.

Flexible, Reliable and Easy to Use

With *ESI Time and Attendance Manager* tracking employees' attendance is no longer a long, complicated task. This best-in-class application provides an easy way to maintain a clear view of employee time records. Its intuitive design improves efficiency and reduces common day to day errors that often occur when maintaining employee attendance records.

- Reports in/out events by RFID readers and Fobs
- Allows employees to clock in/out via a web page
- Enables up-to-the-minute viewing of each employee's current status
- Generates time card reports

Accurate Payroll Assistance

Need assistance with payroll preparation? With *ESI Time and Attendance Manager* you can eliminate the guess-work and provide an accurate record of hours worked to wages earned.

- Calculate employee time automatically based upon in/out events and allowed break periods
- Automatically calculate and summarize hours worked for payroll processing
- Allow administrators to manually adjust hours worked for accuracy of worked hours
- Generate reports for accurate, timely information

Features
